Enjoy A Retirement Income Without Income Taxes!

You've worked hard and you want to enjoy a comfortable retirement.

But outside of an RRSP, what investment plans allow you to grow your wealth without it being eroded by taxation?

And when you eventually start to draw an income in retirement - more taxes!

We have good news!

With some proper planning, you can:

- grow your wealth in a tax sheltered environment,
- choose guaranteed or market-based investment returns,
- enjoy a tax free income, and
- transfer your wealth to your loved ones tax free.

We have the financial solutions to make your retirement dreams a reality!

By utilizing a tax exempt life insurance policy, you can accumulate investments in a tax sheltered environment. When you desire an income from the program, you can assign your policy to a lending institution as collateral for loan advances which are currently not considered to be taxable income.

At the time of your death, the lending institution receives proceeds from the policy to retire your accumulated loan. Any excess amount can go to your beneficiaries tax-free.

Contact your financial advisor today to learn more about how this powerful strategy can work for you.
